

Amendments to the Abstract:

Please replace the Abstract in the Third Substitute Specification, paragraph [0034], with following Abstract:

[0034] ~~The invention concerns a motor vehicle~~ An electric motor unit comprising of a
motor vehicle includes a wiper blade carrier brush holder plate having assembly. The plate
assembly has a brass insert and, a radiator, characterized in that and an electronic card positioned
adjacent the radiator. The plate has assembly also includes a plastic over-molding enclosing the
insert and the radiator. The motor includes a housing formed by the over-moldings and a closure
lid to create a watertight partition wall which allows the condensation water produced by the
radiator to be removed while protecting the electronics located in the electric motor unit. molded
to portions of the brass insert. An outer peripheral edge of the over-molding extends
perpendicularly from a surface of the over-molding to surround at least a portion of the radiator.
